

# Cosmic ray backgrounds in dark matter searches

## Tuesday 26 January 2010

### Cosmic-ray diffusion - FB54 (09:00 - 12:50)

time	[id] title	presenter
09:00	[267] Maurin - Cosmic ray propagation (40' + 10')	
09:50	[268] Strong - Galprop and Diffuse gamma-ray emission / Fermi (40' + 10')	
10:40	Coffee break	
11:10	[269] Maccione - Recent results on the propagation of high energy cosmic ray nuclei and antiprotons (30' + 10')	
11:50	[273] Delahaye - Theoretical uncertainties of the astrophysical electron flux at the Earth (20' + 10')	
12:20	[279] Putze - A MCMC technique to sample transport and source parameters of Galactic cosmic rays (20' + 10')
