

# Welcome to

with kind support from

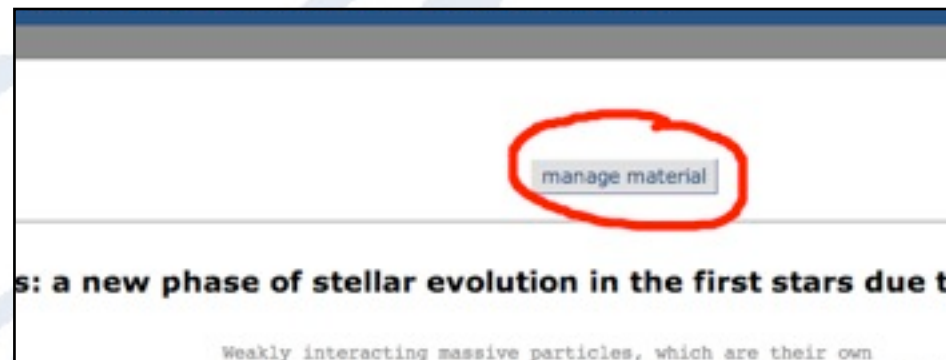

# Information to speakers

- Please upload your talks to the workshop web page, or give it on a USB stick to Natallia Karpenka, [nkarp@fysik.su.se](mailto:nkarp@fysik.su.se)
- We have air in the schedule between the talks, so the default is that the speakers use their own laptops

# Uploading of talks

- Log in to the indico server at <http://agenda.albanova.se/conferenceDisplay.py?confId=3239>
- Go to your talk in the timetable and you should then see a button 'Manage Material'

- Choose to upload slides and they are then available to everyone. Preferably upload pdf files.
- Alternatively, give your talk on a USB stick/card to Natallia Karpenka, [nkarp@fysik.su.se](mailto:nkarp@fysik.su.se)

# Information to speakers II

- We have a presentation remote that works with Mac/PC in all sessions.

# Rooms

- All talks are in the Oskar Klein auditorium (this room)
- The tutorial on Tuesday will be in different rooms, FB41 and FB42
- The tutorial session is not prepared, but we urge all code authors to be available around FB41 and FB42 on Tuesday afternoon to answer questions, show demonstrations, etc

# Doors and alarms...

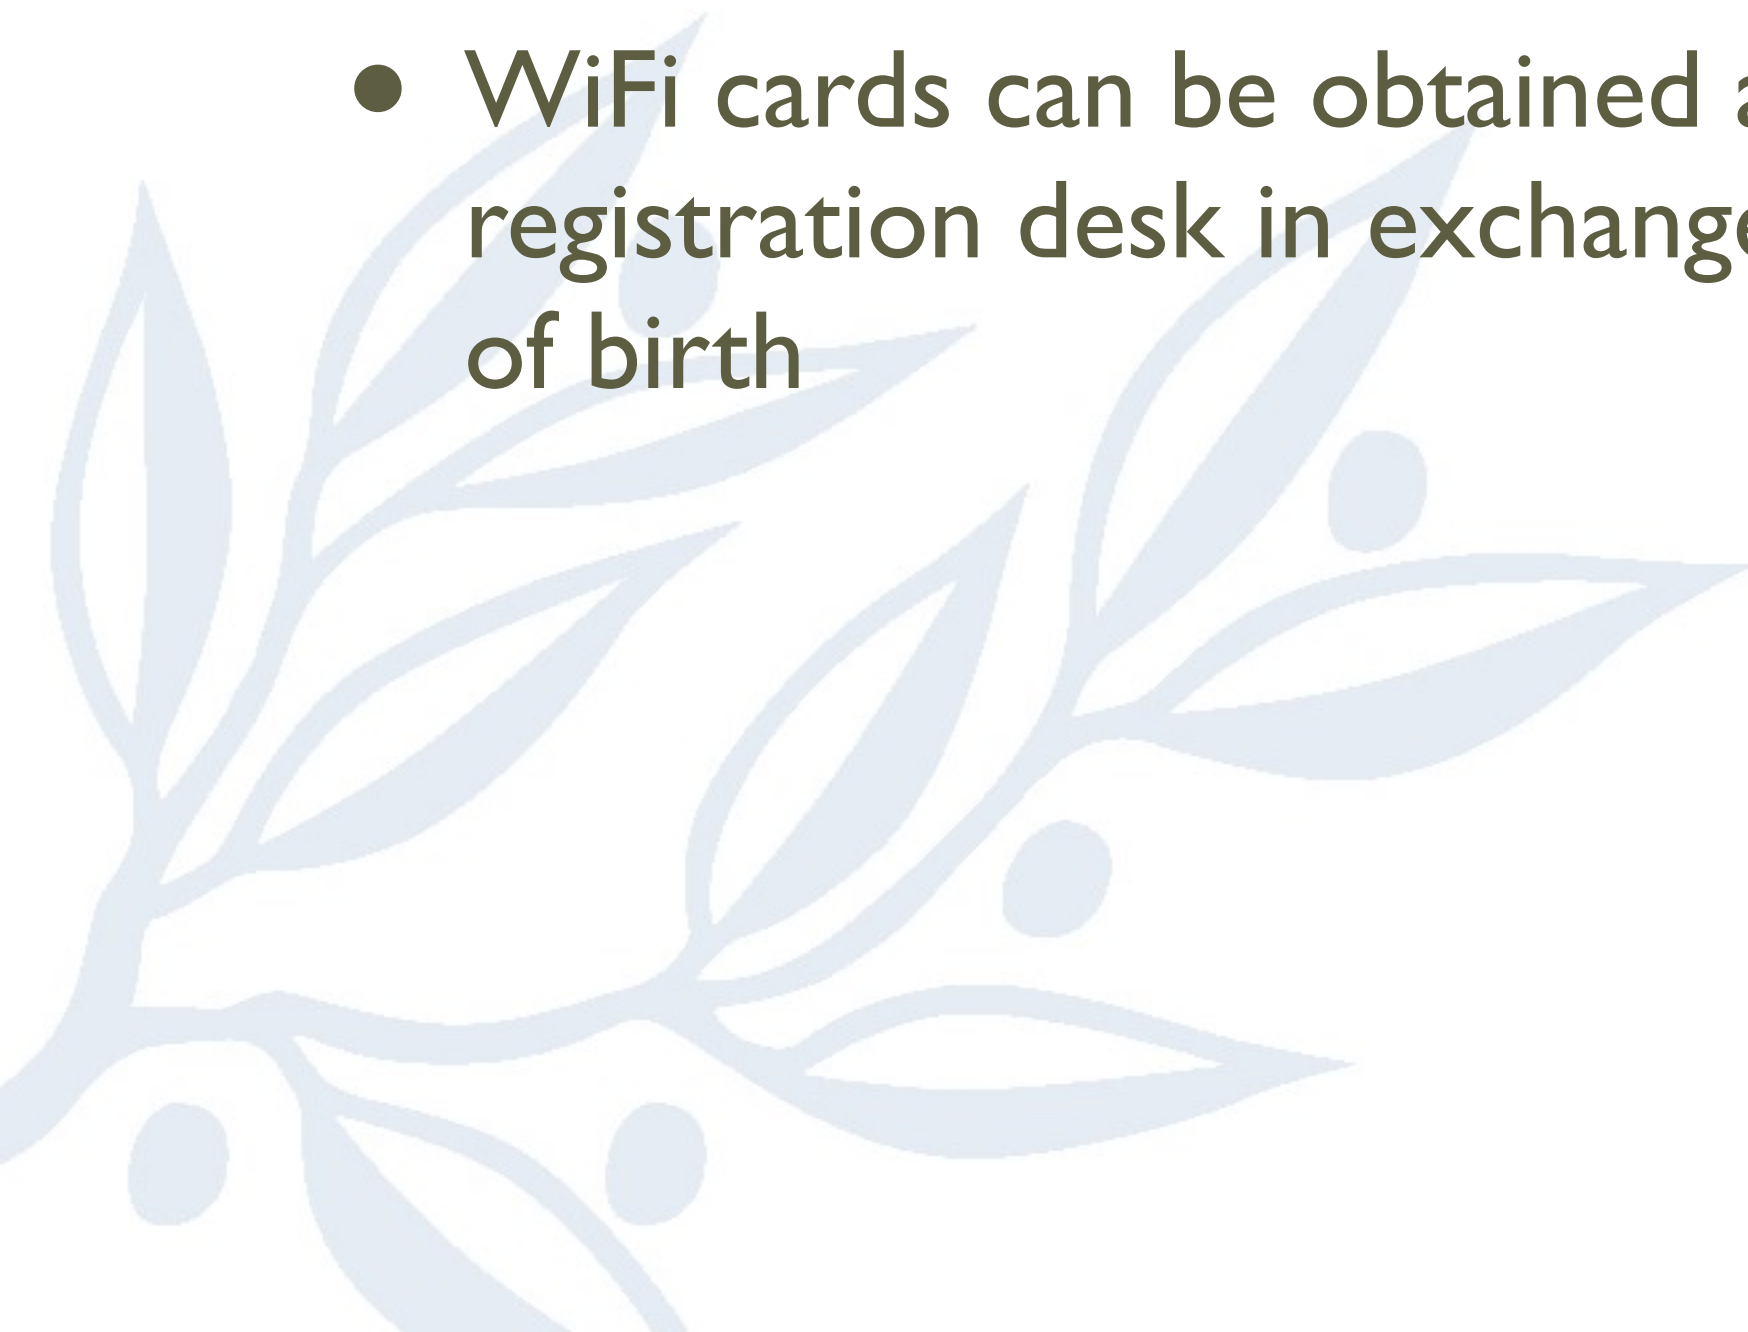

Please, if the door is locked (typically after 19.00)

- **USE the button** to open the door
- **Do NOT use the emergency handle**

# WiFi

- WiFi cards can be obtained at the registration desk in exchange of your date of birth

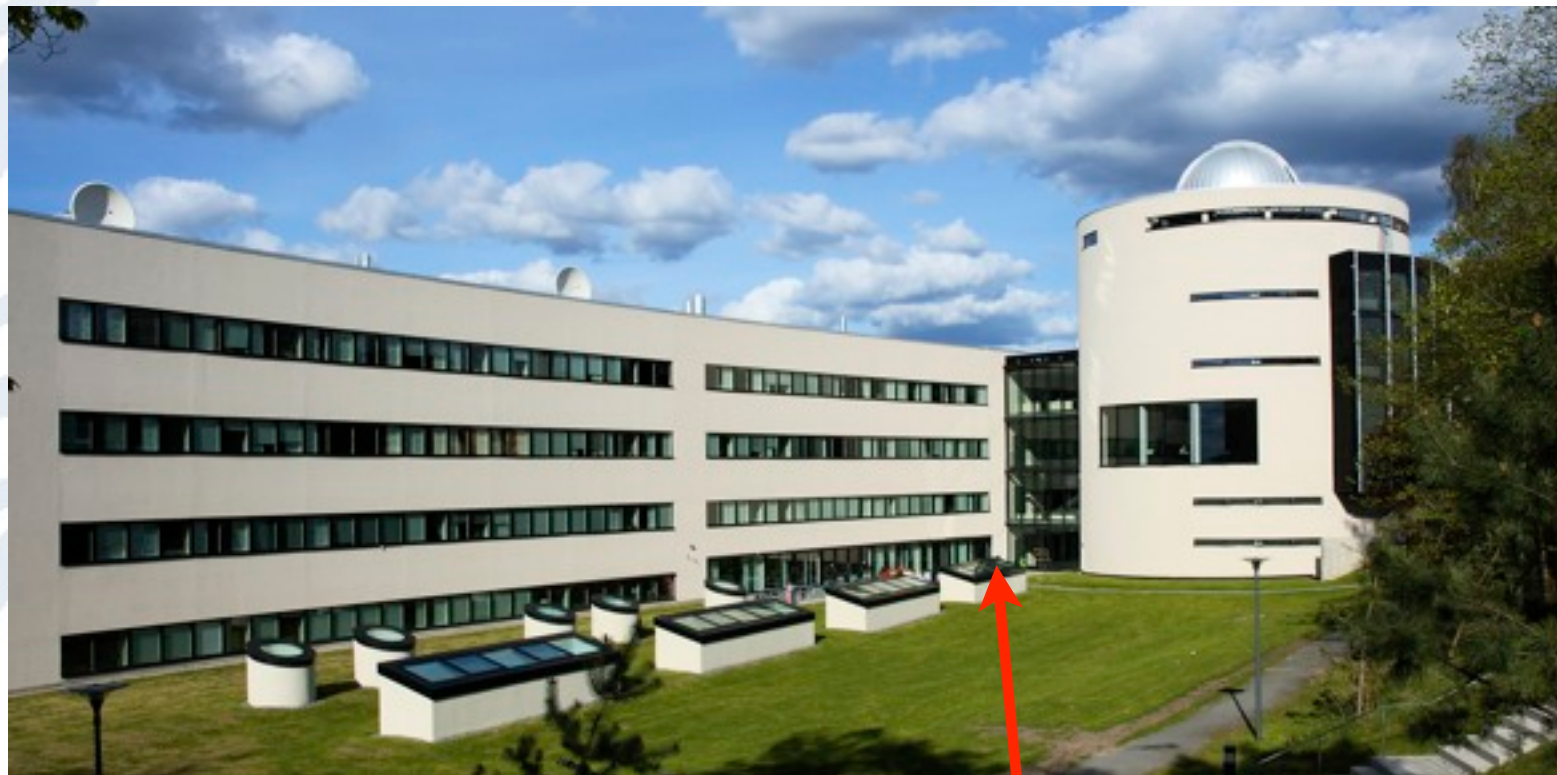

# Coffee and lunch

- Coffee breaks are in the rotunda (around the registration desk)
- Lunch is best had at any of the nearby restaurants (see list of restaurants in your folder). The restaurant in house is also open for those that prefer

# Welcome reception and dinner

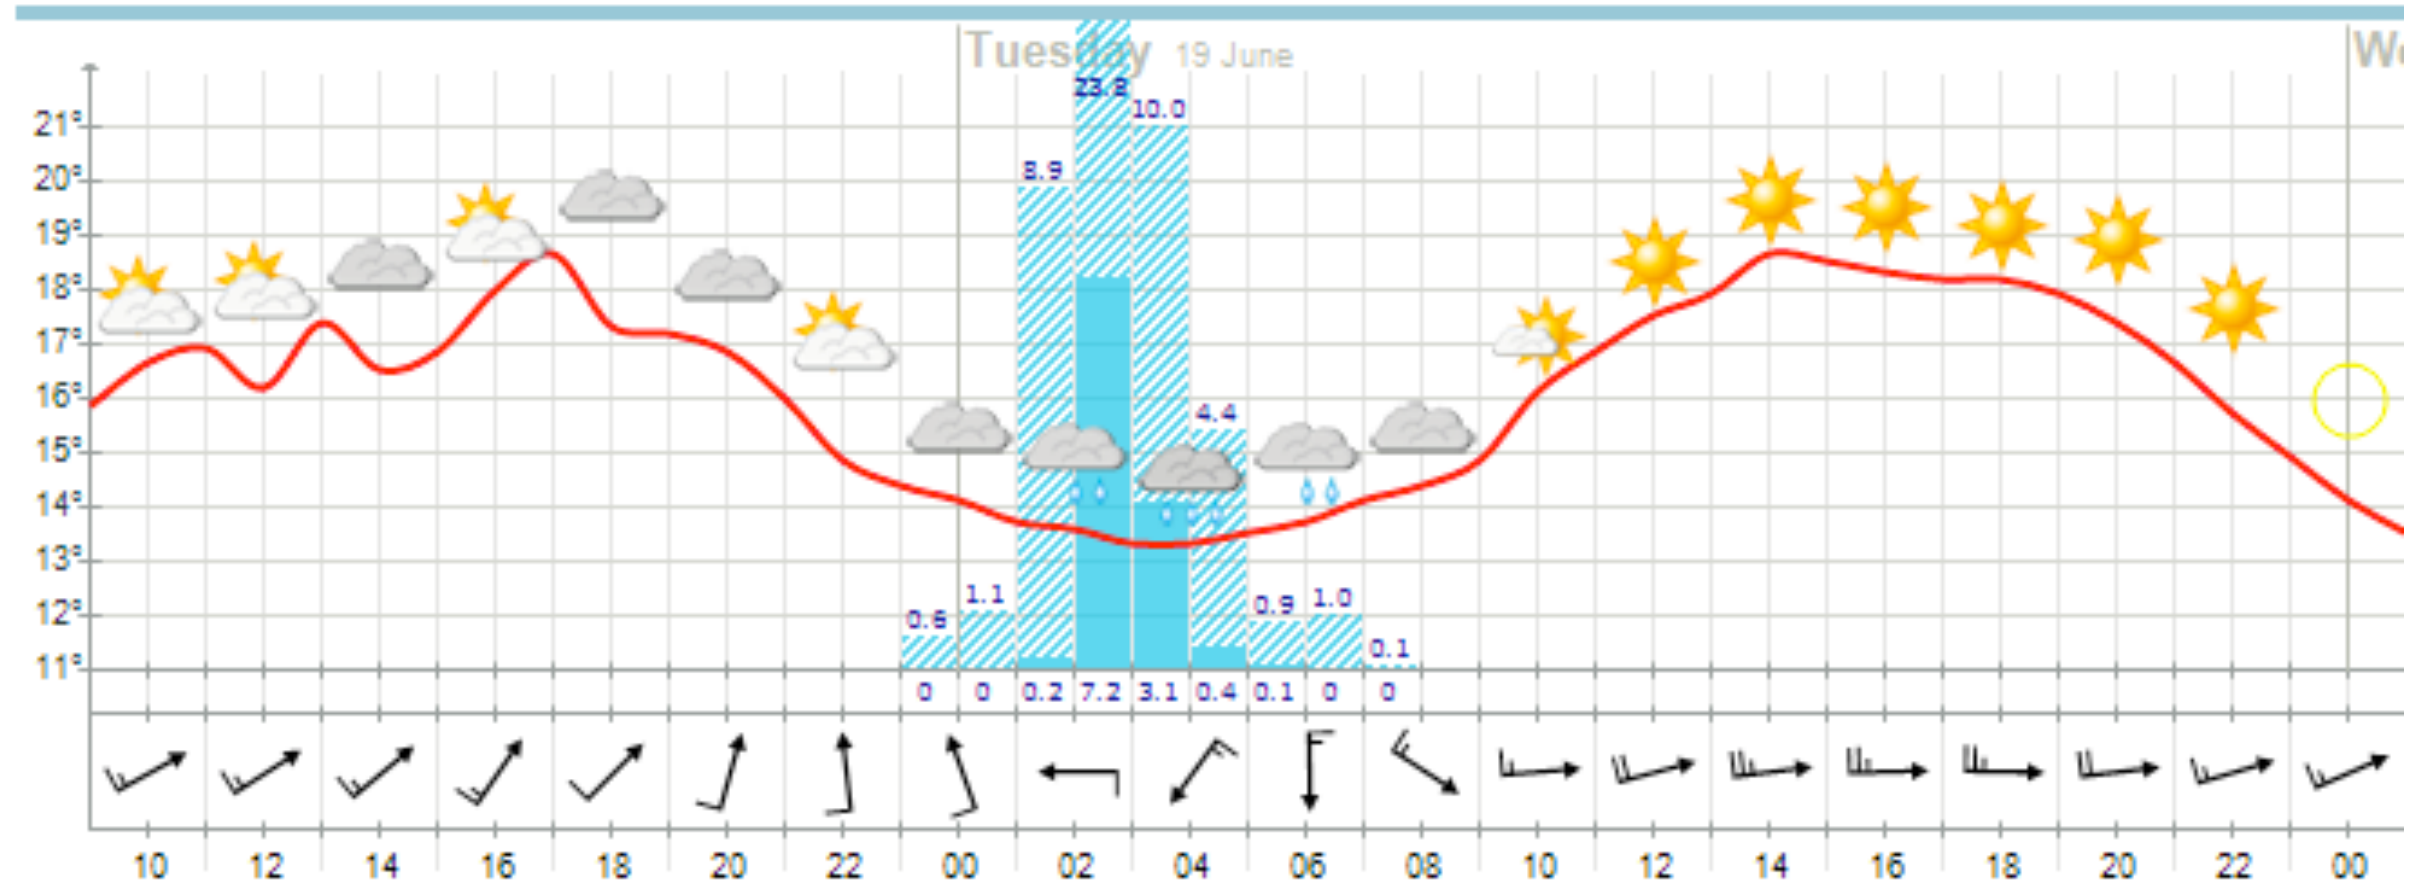

- Welcome Reception Today at 19.00
- Workshop Dinner, Wednesday at 19.00

Both will be held here (outside)!  
(If the weather is bad, we will be inside in neighbouring rooms)

# Weather...

## Meteogram, next 48 hours

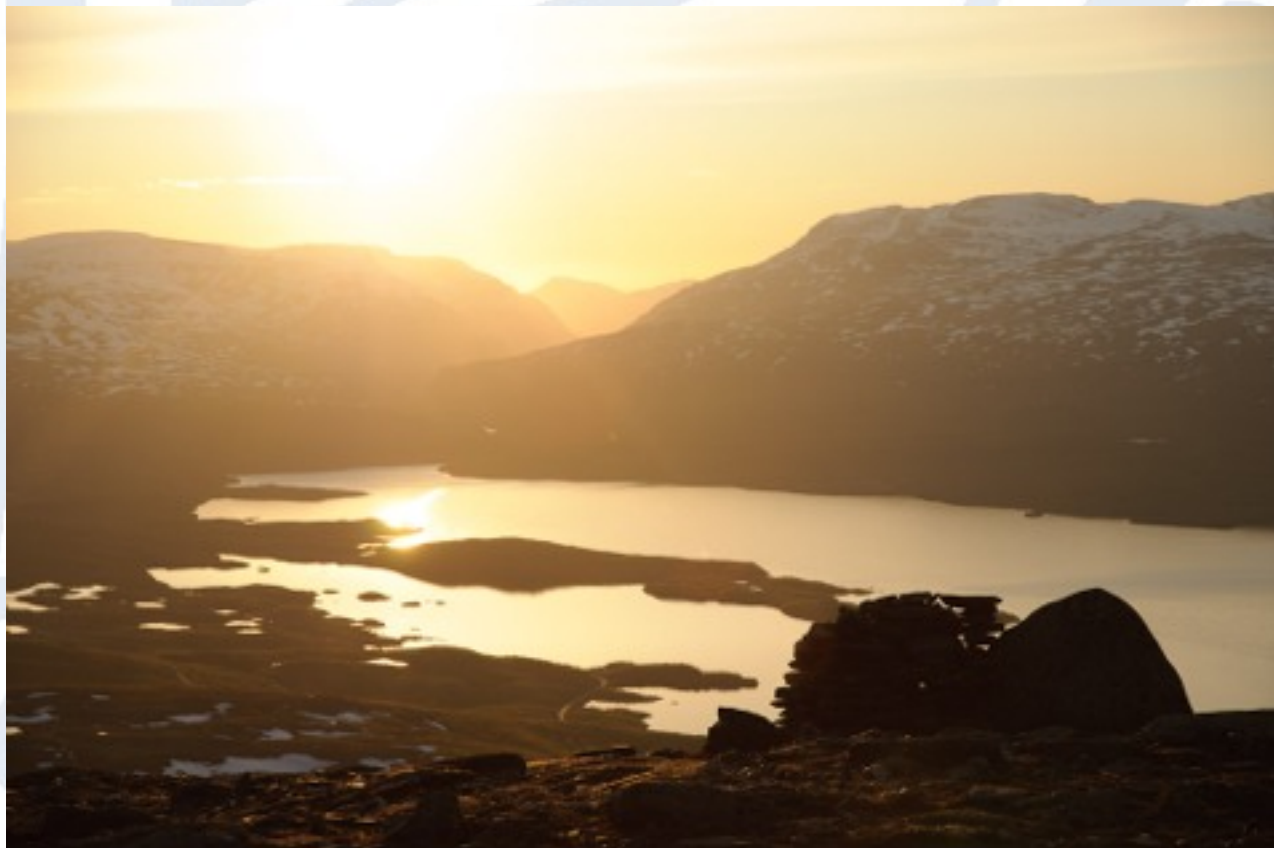

The blue bars show max and min values for precipitation per hour.

Don't be out too late tonight...

# Summer solstice

- The summer solstice occurs on Thursday June 21 2012 at 01:08 local time
- Even if we do not have midnight Sun here, the Sun is up a lot...  
Up: 03.34 (dawn at 01.59)  
Down: 22.05 (dusk at 23.41)

**Thank you  
for coming!**
