

# IRIS-6: The Chromosphere

## Monday, 20 June 2016

### Session 1 - FR4 (09:00 - 12:50)

time	[id] title	presenter
09:00	Welcome	
09:05	[277] Recent IRIS results on chromospheric heating (Invited)	DE PONTIEU, Bart
09:35	[346] Signatures Of Magnetic Reconnection Between Small-scaled Loops In The Solar Transition Region	XIA, Lidong
09:55	[405] Flocculent flows in the chromosphere observed with SST and IRIS	VISSERS, Gregal
10:15	[342] Transition Region and Chromospheric Signatures of Impulsive Heating Events	WARREN, Harry
10:35	Coffee break	
11:20	[417] Hinode-IRIS Analysis of Various Chromospheric Heatings in Emerging Flux Regions (Invited)	TORIUMI, Shin
11:50	[350] IRIS observations of a light wall rooted in a light bridge	YANG, Shuhong
12:10	[324] Peacock jets: dynamics and magnetic topoplogy	ROBUSTINI, Carolina
12:30	[326] A contrail fibril	RUTTEN, Rob
