

IRIS-6: The Chromosphere

Wednesday, 22 June 2016

Session 6 - FR4 (14:15 - 16:10)

time	[id] title	presenter
14:15	[271] Multi-fluid effects in the solar atmosphere (Invited)	COLLADOS, Manuel
14:45	[308] Observational consequences of ion-neutral effects in the low solar atmosphere	MARTINEZ-SYKORA, Juan
15:05	[316] Emergence of granular-sized magnetic bubbles through the solar atmosphere: the path to the transition region	HANSTEEN, V.
15:25	[283] Spectral signatures of spicules in the IRIS channels: observations and preliminary modeling.	ALISSANDRAKIS, Costas
15:45	[280] Small scale chromospheric fibrils observed by SUNRISE 2	GAFEIRA, Ricardo
16:05	LOC announcement
