

How Galaxies form Stars

Wednesday, 24 August 2016

Star Formation and Feedback (09:00 - 13:20)

-Conveners: Matthew Hayes

time	[id] title	presenter
09:00	[402] Feedback on Sub-Galactic Scales: Insights from Starburst Regions (I)	JASKOT, Anne
09:45	[431] How do supernovae regulate star formation and launch galactic winds? (I)	KIM, Chang-Goo
10:30	[383] Superbubbles, Supernovae, and Deregulating Galaxies: Too Big Not to Fail	KELLER, Ben
10:50	Coffee break	
11:20	[425] The feedback of super star clusters on the ISM	BIK, Arjan
11:40	[414] Feedback efficiency in young stellar clusters in M83	HOLLYHEAD, Katherine
12:00	[386] Blustering and Blasting - Stellar feedback and its Chemical Tracers	CREASEY, Peter
12:20	[385] Simulations of realistic dwarf galaxies including Population III feedback	VERBEKE, Robbert
12:40	[401] Triggered formation of cold gas from superbubbles	NTORMOUSHI, Evangelia
13:00	[391] How black hole feedback may trigger star formation in galaxies	ISHIBASHI, Wako
