

# Statistical Physics of Complex Systems

## Saturday, May 11, 2019

### contributed talks (various applications) - Alba Nova FB52 (11:00 AM - 12:30 PM)

time	[id] title	presenter
11:00 AM	[336] Universal law for waiting internal time in seismicity and its implication to earthquake network	SUZUKI, Norikazu
11:15 AM	[337] Statistical physics of a foreign exchange market: kinetic mean-field theory of a stochastic many-body trader model	KANAZAWA, Kiyoshi
11:30 AM	[346] Gross domestic product growth rates as confined Levy flights	LERA, Sandro
11:45 AM	[347] Competing Universalities in Kardar-Parisi-Zhang Growth Models	DASHTI-NASERABADI, Hor
12:00 PM	[340] Re-examining Einstein's B coefficient and rate equations with Rabi model	BISWAS, Shyamal
