

Statistical Physics of Complex Systems

Friday, May 10, 2019

contributed talks (spatial complexity/math) - Alba Nova FB53 (4:30 PM - 6:00 PM)

time	[id] title	presenter
4:30 PM	[323] Multiscale local porosity theory, weak limits, and dielectric response in composite and porous media	HILFER, Rudolf
4:45 PM	[324] Rigidity percolation in random rod packings	HEROY, Samuel
5:00 PM	[325] Transport, condensation and the quantum Fick's law in open quantum systems	SHPIELBERG, Ohad
5:15 PM	[327] Fluctuation theorem for quasi-integrable systems	GOLDFRIEND, Tomer
5:30 PM	[328] Fluctuations and correlation functions of occupation measures in single-file diffusion	LAPOLLA, Alessio
5:45 PM	[348] Correlations in single-file systems	PONCET, Alexis
