

Cosmic Dawn at High Latitudes Conference

Wednesday 26 June 2024

Session 5 - Beijer auditorium (09:15 - 12:30)

time	[id] title	presenter
09:15	[149] How useful are simulations for understanding reionization and its sources?	ROSDAHL, Joakim
09:45	[41] Galaxies as agents of cosmic reionization: new results from JWST WFSS and VLT/MUSE observations	MATTHEE, Jorryt
10:00	[109] Radiation-Driven Superwinds and Lyman Continuum Escape in Local Reionization-Era Analogs	KOMAROVA, Lena
10:15	[138] Are local diagnostics for LyC escape fraction valid during the EoR?	SCARLATA, Claudia
10:30	[33] LyC Escape and IGM Tomography Using the 600-900Å Continuum of the Sunburst Arc	BERG, Michelle
10:45	Morning coffee/tea break	
11:15	[57] The impact of mergers on the Lyman Continuum photons escape in Galaxies during the epoch of reionization	MASCIA, Sara
11:30	[94] Influence of galactic mergers on the escape of LyC radiation during reionization	KOSTYUK, Ivan
11:45	[19] Fluctuations and Evolution of the Ionizing Background and Mean Free Path during the Late Stages of Reionization	CHEN, Huanqing
12:00	[75] The forest at EndEoR: The effect of Lyman Limit Systems on the End of Reionisation	GEORGIEV, Ivelin
12:15	[141] Impact of Self-shielding Minihalos on the Ly α Forest at High Redshift	PARK, Hyunbae
