This is a template of the abstract with authors from different institutions. You can indicate up to 6 different institutions by labels `\ada ... \adf`. Use `\ac` command to separate labels. For the template of the abstract with authors from the same institution see `templ1.tex`.

Abstract must fit in a 11 cm \times 16 cm frame and typed using a 10 pt font (i.e. approximately 300 words). Please underline the presenting author's name.

The L^AT_EX style file and templates are available from the workshop WWW page <https://icmp.lviv.ua/statphys2025>

The size of abstract is restricted to **one page**. Please note that the current L^AT_EX style applies *an automatic cut-off* of the abstract to *one* page.

Both source `*.tex` file, with figures if any, and generated `*.pdf` file must be submitted in electronic form to `statphys2025@icmp.lviv.ua`
