A programme with titles and abstracts will be ready next week. If you stay in Gothenburg, you will have to arrange your own accommodation. I reserve the right to make minor alterations in the programme. I am very happy that so many researchers have decided to come, and that we have reached many new names. There will be plenty of time to talk to each other during the day and the early evening!

Many thanks to Rymdstyrelsen and the Institute of Physics, Goteborg University who kindly sponsor the event!
