

# AI Discussion Forum

## Meeting summary

Renske Wierda — Agentic AI hub meeting — 20/04/2026

# Topics

- List of topics can be found at <https://drive.proton.me/urls/RXVTP1REF0#DKyWmQ0ira86>
- Currently there's only an initial list with suggestions from me, please add your own!
- Every topic will have a topic responsible: this person will give a short (5-10 min) introduction at the start of the meeting (can be background info, a recap of a blogpost, a polarising statement, etc.)
- Next week's topic: confirmation bias in AI experimentation

# Organisation

- There'll be a (somewhat) strict time structure with time reserved for an introduction, the discussion and a summary of the discussion
- Two additional discussion roles:
  - **Discussion leader**
  - **Note taker**
- Ideally these two people do not participate in the discussion, but we're going to loosen with this requirement since attendance doesn't support it

# Summary: warmup discussion

- Topic: What is your favourite instance of AI being used and why?
- No official summary since this was a warmup and we didn't have an assigned note taker
- But interesting discussions on the meaning of creativity and what constitutes useful AI assistance
